PANEL - Standards for the Digital Stage

Benefits of Standards

- Reduce Costs
- Reduce Risk of Technological Adoption
- Anticipate Technical Requirements
- Increase Productivity
- Promote Efficiency
- Protect Health and Safety
- And Many More…

Specific Focus…

Digital communications and interoperability, Blockchain, Model-based design and testing, Artificial intelligence in safety critical systems this panel will bring together industry experts to discuss the latest progress in these fields.

Panel Goals – Direct Engagement with YOU!

- Discuss what existing standards are working well?

- What standards need to be updated/improved?

- What challenges are ripe for standards development?

- Dig into panelist thoughts and charges

- Build the PHM Society's standards community

Panel Format

- Each speaker gets 7 minutes (will get a warning sound at 1 minute)

- Will invite panelists up after all panelists have presented

- Moderator will open with one question to all panelists

- Moderator will field questions from the audience
